Be Prepared to Save a Life!

.....

Naloxone (Narcan®) is a medication designed to rapidly reverse an opioid overdose. Naloxone can begin working within minutes to restore breathing, consciousness and can save a life!

The Will County Health Department now has 10 red Naloxone distribution boxes located throughout Will County. The boxes, donated by Saved My Life, are self-serve and the Naloxone is free.

BOX LOCATIONS

- The Will County Health Department – Main Office (501 Ella Ave. – Joliet)
- The Will County Community Health Center (1106 Neal Ave. – Joliet)
- The Will County Health Department Northern Branch Office (323 Quadrangle Dr. – Bolingbrook)
- The Will County Health Department Eastern Branch Office (5601 W. Monee-Manhattan Rd. – Monee)

- Will County Office Building - (302 N. Chicago St. – Joliet)
- White Oak Library District - Crest Hill Branch (20670 City Center Blvd. – Crest Hill)
- White Oak Library District - Lockport Branch (121 E. 8th St. – Lockport)
- White Oak Library District - Romeoville Branch (201 W. Normantown Rd. – Romeoville)

fentanyl: fentanyl: fentanyl: changes everything

#FacingFentanyl

**FACING
FENTANYL**

**THERE IS NO SUCH THING
AS A SAFE DOSE OF FENTANYL**

it's highly addictive and just
2mgs is enough to kill

7 out of 10 fake pills contain a
lethal dose

- Illicit fentanyl has been found in all street drugs including heroin, cocaine & meth.
- Illicit fentanyl has been found in fake pressed pills that look like pharmaceutical-grade Percocet, Adderall, and Xanax.
- Illicit fentanyl is odorless and tasteless. You won't know it's hiding in the drugs you choose to use or try.

Why take the risk? In today's drug market, it is impossible to know if a drug contains fentanyl. Even marijuana and vape pens have the potential to be laced. Do not take anything not prescribed to you by a doctor and purchased from a licensed pharmacy.

facingfentanylnow.org

**-Illicit fentanyl is a man
made synthetic opioid**

**-50x's stronger than heroin 100x's
more potent than morphine**

**-Fentanyl poisoning is the #1 cause
of death in Americans ages 18-45**

WARNING

SIGNS OF FENTANYL POISONING or OPIOID OVERDOSE

- ☠ Unconsciousness, very small pupils, vomiting, inability to speak, limp arms & legs, purple lips and/or fingernails
- ☠ Discolored Skin: bluish/purple (lighter skin complexions); grayish (darker skin complexions)
- ☠ Weak pulse, foaming at the mouth, and/or blood from nose and mouth
- ☠ Snoring, gasping or gurgling sounds - heartbeat slows or stops

IMMEDIATELY
**CALL 911 IF YOU SUSPECT
FENTANYL POISONING
BE SAFE NOT SORRY!**

CARRY NALOXONE

Naloxone (Narcan) is a medicine that rapidly reverses an opioid overdose. It can quickly restore normal breathing to a person if their breathing has slowed or stopped because of a poisoning or opioid overdose. It has no effect on someone who does not have opioids in their system, and it is not a treatment for opioid use disorder. Naloxone needs to be administered immediately, every second counts.

**THIS SPRAY CAN...
SAVE A LIFE!**

NALOXONE SAVES LIVES

Naloxone is a medication that can reverse an opioid overdose, if given in time. It even works on drugs that may be mixed or laced with fentanyl. Your workplace may have naloxone in its first-aid kit. Ask your manager for training if you don't know how to use it.

If a customer or co-worker experiences an opioid overdose, it's important to know what to do: call 911 right away, use naloxone if you have it, and get medical help as soon as possible.

Do you know the signs of overdose?

- Small, constricted "pinpoint pupils"
- Falling asleep or losing consciousness
- Slow, weak, or shallow breathing
- Choking or gurgling sounds
- Limp body
- Cold, clammy, and/or discolored skin
